

SUSTAINABILITY

Why the right machine is critical to your initiative

The right machine does the following:

- **Reduce** corrugated waste by eliminating machine jams
Use less corrugated overall
- **Reduce** product damage
Square cases pack better, stack better and ship better
- **Reduce** returned goods
Reduce rework and replacement packaging materials
- **Reduce** landfill impact
Corrugate is 100% recyclable

C-MODULAR
Case erectors designed to reduce corrugated damage and waste

IN-LINE ERECTORs
Smaller foot print erectors with all the same technologies to produce square cases reducing product damage

SUSTAINABILITY - REDUCE

3 actionable steps to help meet your goals

1 Restore & Optimize Existing equipment

- Return case erectors to full functional condition
- Optimize performance and efficiency
 - › Reduce energy consumption
 - › Reduce air consumption
 - › Reduce carbon emissions

2 Reduce Corrugate Usage By producing square cases

- Precise blank and case handling allows
 - › Thinner corrugated
 - › More recycled content
- Reduce damage
 - › Square cases pack, stack and ship better
- Reduce rework and need for replacement packaging materials
 - › Reduce landfill impact

3 Replace Old Machines With new technologies

- Reduce energy and air consumption with machines and options designed to optimize performance & efficiencies
 - › Sleep modes, air leak detection, low friction belts, Venturi systems and more
 - › Reduce downtime and waste by eliminating all 4 common causes of case jams
 - › Eliminate the common causes of wear and tear

Support your Reduce strategies with

linc Lantech Intelligent Network Connection™

Actionable Analytics, Anytime, Anywhere

- Monitor, Maintain & Improve
 - › Machine operation
 - › Machine performance

PRECISE CASE HANDLING

Reduce corrugate waste with precision case handling

HS RANDOM SEALER

Case sealers capable of handling underfilled cases reducing the need for void fill

LINC

A machine visibility solution to help you meet your sustainability goals. Now available on C-Modular case erectors
